the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required in a cost-effective manner. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

The aim of this paper is to review the literature on the impact of these initiatives on the performance of the public sector, and to discuss the implications for the future.

The paper is organised as follows. Section 2 discusses the background to the initiatives, and Section 3 discusses the impact of the initiatives on the performance of the public sector.

Section 4 discusses the implications for the future, and Section 5 concludes the paper.

2. Background to the initiatives

The public sector in the UK has been the subject of a number of initiatives in the 1990s, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures. These initiatives have been aimed at improving the efficiency of the public sector, and ensuring that the public sector is able to deliver the services that are required in a cost-effective manner.

The introduction of competition has been a key feature of the initiatives, and has been aimed at encouraging public sector organisations to compete with each other, and with the private sector.

The restructuring of public sector organisations has also been a key feature of the initiatives, and has been aimed at reducing the number of public sector organisations, and improving the efficiency of the public sector.

The introduction of performance measures has also been a key feature of the initiatives, and has been aimed at encouraging public sector organisations to improve their performance, and to ensure that they are able to deliver the services that are required in a cost-effective manner.

The impact of these initiatives on the performance of the public sector has been the subject of a number of studies, and the results of these studies have been mixed.

Some studies have found that the initiatives have led to improvements in the performance of the public sector, while other studies have found that the initiatives have led to a decline in the performance of the public sector.

The results of these studies have been influenced by a number of factors, including the quality of the data, the methods used, and the time period over which the data were collected.

Despite the mixed results, there is a growing consensus that the initiatives have had a significant impact on the performance of the public sector, and that the public sector is now better equipped to deliver the services that are required in a cost-effective manner.

3. Impact of the initiatives on the performance of the public sector

The impact of the initiatives on the performance of the public sector has been the subject of a number of studies, and the results of these studies have been mixed.

Some studies have found that the initiatives have led to improvements in the performance of the public sector, while other studies have found that the initiatives have led to a decline in the performance of the public sector.

The results of these studies have been influenced by a number of factors, including the quality of the data, the methods used, and the time period over which the data were collected.

Despite the mixed results, there is a growing consensus that the initiatives have had a significant impact on the performance of the public sector, and that the public sector is now better equipped to deliver the services that are required in a cost-effective manner.

4. Implications for the future

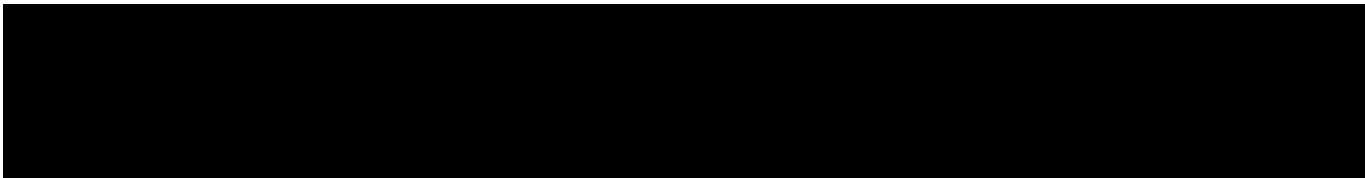

The initiatives have had a significant impact on the performance of the public sector, and the public sector is now better equipped to deliver the services that are required in a cost-effective manner.

However, there are a number of challenges that the public sector faces in the future, and it is important that these challenges are addressed in order to ensure that the public sector is able to deliver the services that are required in a cost-effective manner.

One of the key challenges is the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required in a cost-effective manner.

Another key challenge is the need to improve the quality of the services that the public sector delivers, and to ensure that the public sector is able to deliver the services that are required in a cost-effective manner.

It is important that these challenges are addressed in order to ensure that the public sector is able to deliver the services that are required in a cost-effective manner, and that the public sector is able to deliver the services that are required in a cost-effective manner.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required in a cost-effective manner. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

The aim of this paper is to review the literature on the impact of these initiatives on the performance of the public sector, and to discuss the implications for the future.

The paper is organised as follows. Section 2 discusses the background to the initiatives, and Section 3 discusses the impact of the initiatives on the performance of the public sector.

Section 4 discusses the implications for the future, and Section 5 concludes the paper.

2. Background to the initiatives

The public sector in the UK has been the subject of a number of initiatives in the 1990s, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures. These initiatives have been aimed at improving the efficiency of the public sector, and ensuring that the public sector is able to deliver the services that are required in a cost-effective manner.

The introduction of competition has been a key feature of the initiatives, and has been aimed at encouraging public sector organisations to compete with each other, and with the private sector, in order to improve their efficiency.

The restructuring of public sector organisations has also been a key feature of the initiatives, and has been aimed at reducing the number of public sector organisations, and improving the efficiency of the remaining organisations.

The introduction of performance measures has also been a key feature of the initiatives, and has been aimed at encouraging public sector organisations to improve their performance, and to ensure that they are able to deliver the services that are required in a cost-effective manner.

The impact of these initiatives on the performance of the public sector has been the subject of a number of studies, and the results of these studies have been mixed.

Some studies have found that the initiatives have led to improvements in the efficiency of the public sector, and that the public sector is now able to deliver the services that are required in a cost-effective manner.

Other studies have found that the initiatives have led to a decline in the efficiency of the public sector, and that the public sector is now unable to deliver the services that are required in a cost-effective manner.

The results of these studies have been mixed, and it is therefore difficult to draw any conclusions about the impact of the initiatives on the performance of the public sector.

However, it is clear that the initiatives have had a significant impact on the public sector, and that the public sector is now facing a number of challenges.

These challenges include the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required in a cost-effective manner.

The public sector is also facing a number of other challenges, including the need to improve the quality of the services that it provides, and to ensure that it is able to meet the needs of the public.

The public sector is therefore facing a number of challenges, and it is therefore essential that it is able to meet these challenges in a cost-effective manner.

The public sector is therefore facing a number of challenges, and it is therefore essential that it is able to meet these challenges in a cost-effective manner.

The public sector is therefore facing a number of challenges, and it is therefore essential that it is able to meet these challenges in a cost-effective manner.
